## DETAILED ACTION

### ***Specification***

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 , drawn to perfluoropolyethers and compositions containing said compounds, classified in class 568, subclass 615 and class 252, subclass 380.
- II. Claims 11-35, drawn to process for producing a perfluoropolyether, classified in class 568, subclass 582.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, such as disclosed in Lagow (US 4,523,039) or WO9115616.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. During a telephone conversation with Lucas Shay on August 6, 2003 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-10. Affirmation of this election must be made by applicant in replying to this Office action. Claims 11-35 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Caporiccio (US 5,212,123).

Caporiccio teaches a grease composition comprising 7-35 parts vinylidene fluoride-hexafluoroisobutylene copolymer powder and polytetrafluoroethylene as

Art Unit: 1714

thickeners for a liquid perfluoropolyether of formulae that anticipates the perfluoropolyethers of the present invention (see abstract; col. 1, line 54-68; col. 2, lines 25-38; col. 4, formulae (f) and (g)).

Accordingly, Caporiccio teaching all the limitations of the claims, anticipates the claims.

9. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Moggi (US 5,077,097).

Moggi teaches an emulsion composition comprising polytetrafluoroethylene and a perfluoropolyether (see abstract). Moggi teaches perfluoropolyethers that anticipate those of the present invention (see col. 3, lines 40-47). The perfluoropolyether is present in the composition in an amount from 10-100 g/m<sup>2</sup> (see col. 5, lines 18-21; col. 7, line 39).

Accordingly, Moggi teaching all the limitations of the claims, anticipates the claims.

10. The prior art made of record and not relied upon is cited for teaching compositions that contain perfluoropolyethers and is considered pertinent to applicant's disclosure.
